

KringleCon 4: Calling Birds!

Speaker UNPreparedness Room

1. Click to talk to Morcel Nougat

Hello and welcome to the speaker _Un_Preparedness Room!

I'm Morcel Nougat, elf extraordinaire.

I've heard the talks at the other con across the way are a bit... off.

I really don't think they have the right sense about what makes for a wonderful holiday season. But, anyway!

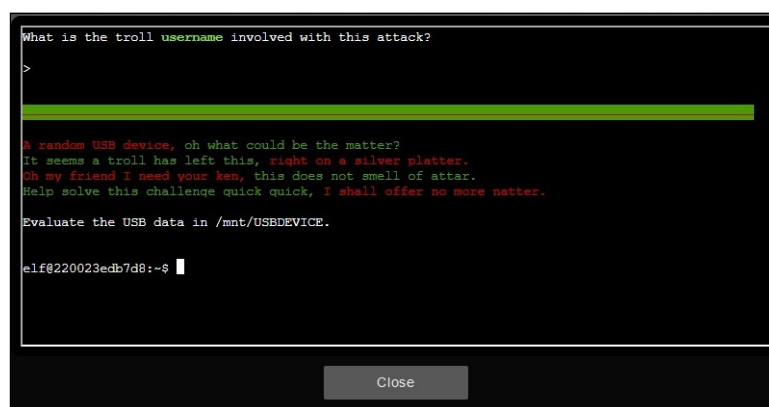

Say, do you know anything about USB Rubber Duckies?

I've been playing around with them a bit myself.

Please see what you can do to help solve the Rubber Ducky Objective!

Oh, and if you need help, I hear Jewel Loggins, on this floor outside this room, has some experience.

2. Click Strange USB Device Cranberry Pi terminal

3. Type `python3 mallard.py -f /mnt/USBDEVICE/inject.bin | more`

4. Press the Space bar

5. Type `python3 mallard.py -f /mnt/USBDEVICE/inject.bin | grep base64 | cut -d " " -f2-8 > cmd`
6. Type `chmod +x cmd`
7. Type `./cmd`
8. Click in the **Top** window
9. Type `ickymcgoop`

```

Your answer is correct! Drat that Icky McGoop!
