Professor Snowman Solution

KringleCon 4: Calling Birds!

1) KringleCon Orientation

- 1. Click to talk to Jingle Ringford
- 2. Click the WiFi Dongle
- 3. Click the Hammer (Item) icon

4. Click Open WiFi CLI

```
ATTENTION ALL ELVES

In Santa's workshop (wireless division), we've been busy adding new Cranberry Pi features. We're proud to present an experimental version of the Cranberry Pi, now with Wi-Fi support!

This beta version of the Cranberry Pi has Wi-Fi hardware and software support using the Linux wireless-tools package. This means you can use iwlist to search for Wi-Fi networks, and connect with inconfig! Read the manual pages to learn more about these commands:

man iwlist

man iwconfig

I'm afraid there aren't a lot of Wi-Fi networks in the North Fole yet, but if you keep scanning maybe you'll find something interesting.
